

Patience, focusing, determination, and faith have landed Empower Tech "alumnus" Mitchell Fink a position on Mayor Antonio Villaraigosa's staff!

Mitch sends a big thanks to Eric and Empower Tech staff for stressing the importance of learning.

Mitch, who has a developmental disability, overcame his obstacle, through hard work and dedication, learned the computer skills necessary to perform his new job at City Hall during his time at EmpowerTech.

He looks forward to the trek downtown on Mondays and Thursdays. The bulk of his position is data entry. He enters certificate requests into a city database and updates any information such as due dates, how the certificates will be received, etc. Mitch is also responsible for filing these requests.

He has terrific bosses and is honored to know our very own Mayor Villaraigosa!
